

Lesson study program

I got good experiences from lesson study activities being done in some schools of Bandung city Indonesia, such as the way the teachers are preparing lesson in group, the way they are presenting to their students, the way they are commenting their lessons, how they are positive to accept comments and feedbacks given from observers. The discussions made after the open lesson were interesting.

Tour at Smoky mountain and Asia Africa Museum

Interesting tour programme was arranged by JICA-UPI management team in February 2013, the place of our tour were smoky volcanic mountain nearby Bandung city and Asia –Africa museum in Bandung city. This smoky Volcanic Mountain is the coldest place of Bandung area and at the top this mountain there is sulphur smoke that comes out of the ground. This mountain is covered by a very attractive natural forest. It is a very attractive and interesting area especially for those who are from outside Indonesia and who are interested to visit Indonesia.

In the museum there are many historical photo galleries that show the relation ship between Indonesia and some African countries during colonialism.

In general I am very chance full to visit this volcanic mountain and this Historical Museum.
